# Abdel Karim dawoud

Full stack web developer

📱 +961 71721926 • ✉ abdekarimdawoud@gmail.com

🌐 Github: github.com/aboudiria • Tripoli - Lebanon

Recent computer science graduate with a strong aptitude for adapting quickly to new software. Experienced in full stack software development, eager to contribute and grow within a team of seasoned professionals. Proficient in various programming languages and technologies.

## Education

**Lebanese University, Faculty of Science**                                   **Tripoli** - **Lebanon**
*Bachelor's degree in computer science,*                                          *2020 – 2024*

**High School**                                                              **Tripoli** - **Lebanon**
*Baccalaureate of general science,*                                               *2018 – 2019*

## Previous Experiences

**Bootcamp at TECHLARIOUS**                                                         **Online**
*Full Stack Web Developer*                                              *Oct 2023 – April 2024*

- Mastered the MERN stack: MongoDB, ReactJS, Node.js, Express.js, and JavaScript, enhancing the performance and scalability of web applications.
- Developed and integrated dynamic web applications with RESTful APIs, ensuring seamless data management across MongoDB database..
- Created responsive and interactive user interfaces using ReactJS, TailwindCSS, and Bootstrap, improving user engagement and experience..
- Implemented authentication and authorization mechanisms using JWT and cookie-parser.
Skills : MongoDB, ReactJS, Node.js, and Express.js

**Freelance Projects**                                                       **Beirut** - **Lebanon**
*Full Stack Web Developer*                                                  *Oct 2023 – present*

- **Product Management System**: Developed using JavaScript, focusing on CRUD operations and efficient data handling.
- **Backend Development Project**: Designed and implemented server-side logic, including RESTful API development and JWT authentication, showcasing proficiency in backend technologies.
- **MERN Estate Platform**: Built a comprehensive real estate management system using the MERN stack, including RESTful API integration, JWT authentication, and database management.
- **Instagram Clone (Dastagram)**: Created a full-featured Instagram clone, highlighting capabilities in user authentication, media management, JWT implementation, cookies parsing, and Firebase Cloud Storage for storing user-uploaded content.
Skills:ReactJs, NodeJs,ExpressJs, MongoDB,TailwindCss,ChakraUI,Bootstrap,JWT,Cookie- parser, SocketIO , FireBase Cloud Storage

## Technical and Personal skills

- **Programming Languages:** Javascript, Typescript, Java, C# , html , css, PHP, Oracle SQL , Python
- **Industry Software Skills:** Matlab , Visual studio , SQL serveur
- **Tools:** GitHub, Postman
- **Concepts:** OOP, Design Patterns
- **Frontend Design Framework:** ChakraUI, TailwindCss, Bootstrap
- **Frameworks & Libraries** ReactJS, ExpressJS, NodeJS, MongoDB
- **API technologies:** RESTful API and integration, JWT authentication, Cookies parser
- **Databases technologies:** MongoDB, MySql, oracleSql
- **Cloud Services:** Firebase Cloud Storage
- **Mobile development:** XML, SQL Lite, Java
- **A**rabic ( Fluent) ,French (Good) English (Good)
